

VINCENZO ROMEI

Professore Ordinario di Neuroscienze Cognitive

Università di Bologna · Dipartimento di Psicologia “Renzo Canestrari” · Campus di Cesena

Direttore del Corso di Laurea Magistrale in Neuroscienze e Riabilitazione Neuropsicologica · Responsabile del Consciousness Lab

vincenzo.romei@unibo.it | ORCID: 0000-0003-1214-2316 | Scholar H-index: 45 | Scopus H-index: 37

PROFILO SCIENTIFICO

Neuroscienziato cognitivo con oltre vent'anni di esperienza internazionale, mi occupo delle proprietà temporali della comunicazione cerebrale attraverso l'elettroencefalografia (EEG), la stimolazione cerebrale transcranica non invasiva (NTBS) e la loro combinazione online. I miei interessi di ricerca comprendono: plasticità cerebrale e connettività funzionale; coscienza e consapevolezza visiva; elaborazione sensoriale e meccanismi attentivi; interazioni multisensoriali; percezione del tempo; memoria di lavoro; invecchiamento; codifica predittiva e cervello probabilistico bayesiano; oscillazioni cerebrali e entrainment oscillatorio; autismo e psicosi. Ho ricoperto posizioni di ricerca e docenza presso università di primo piano (Harvard University, University of Geneva, Glasgow, UCL, Essex), portando all'Università di Bologna una prospettiva internazionale consolidata.

IMPATTO BIBLIOMETRICO

POSIZIONE ATTUALE

2022 – oggi	Professore Ordinario di Neuroscienze Cognitive Dipartimento di Psicologia “Renzo Canestrari”, Università di Bologna
2024 – oggi	Direttore del Corso di Laurea Magistrale in Neuroscienze e Riabilitazione Neuropsicologica Università di Bologna
2020 – oggi	Ricercatore IRCCS Fondazione Santa Lucia, Roma
2023 – oggi	Visiting Professor Universidad Antonio de Nebrija, Madrid, Spagna
2022 – oggi	Membro onorario, Instituto Universitario de Neurociencia (IUNE) Universidad de La Laguna, Tenerife, Spagna

PERCORSO ACCADEMICO E FORMATIVO

2022 – oggi	Professore Ordinario Università di Bologna
2017 – 2022	Professore Associato Università di Bologna
2016 – 2017	Full Professor University of Essex, UK
2015 – 2016	Reader University of Essex, UK
2013 – 2015	Senior Lecturer University of Essex, UK
2010 – 2012	Senior Research Associate University College London (UCL), UK
2008 – 2009	Research Associate University of Glasgow, UK

- 2005 – 2007 **Post-doctoral Research Fellow** University of Geneva, Svizzera
- 2003 – 2004 **Visiting Research Fellow** Harvard Medical School, USA
- 2001 – 2005 **Dottorato in Psicologia** Sapienza Università di Roma
- 1995 – 2001 **Laurea in Psicologia – 110/110 con lode** Sapienza Università di Roma

AREE DI EXPERTISE

Neuroscienze delle oscillazioni cerebrali e della coscienza

- Oscillazioni alfa, beta e theta: ruolo causale nella percezione visiva, nell'attenzione e nella memoria di lavoro
- Entrainment oscillatorio con TMS ritmica e tACS: approcci causali allo studio dei ritmi cerebrali
- Coscienza visiva e consapevolezza percettiva: meccanismi oscillatori e connettività funzionale
- Codifica predittiva e modello bayesiano del cervello: substrati neurali e variabilità individuale

Stimolazione cerebrale non invasiva e connettività

- Sviluppo di protocolli TMS-EEG per la valutazione causale delle funzioni cognitive
- Cortico-cortical Paired Associative Stimulation (ccPAS): plasticità delle reti visive e sensorimotorie
- Applicazioni cliniche: riabilitazione post-stroke, disturbi della coscienza, migraine, spettro autismo-psicosi

Elaborazione multisensoriale e interazioni crossmodali

- Integrazione audiovisiva e illusioni multisensoriali; effetto della frequenza alfa individuale sulla percezione
- Interazioni crossmodali e spazio peripersonale; elaborazione temporale e simultaneità

Formazione e didattica

- Docente di Neuroscienze Cognitive, Coscienza, Metodi di ricerca in Neuroscienze e Stimolazione cerebrale non invasiva
- Supervisione di oltre 100 studenti triennali e magistrali; mentoring di 10 dottorandi e 2 postdoc
- Oltre 90 conferenze internazionali (Harvard, Oxford, Cambridge, UCL, Osaka University, ecc.)

FINANZIAMENTI COMPETITIVI SELEZIONATI

- 2023–2026 **PRIN PNRR (MUR) – "Investigating the plasticity of human predictive coding through neuromodulation"** Local PI | € 225.000
- 2023–2026 **PRIN (MUR) – "Predictive waves in human perception and individual differences along the autism-schizophrenia continuum"** PI | € 264.000
- 2023–2026 **Ministerio de Ciencia, España – "PASIV: El papel de la acción en la selección de información visual en la Memoria Operativa"** Co-I | € 98.000
- 2023–2025 **John Templeton Foundation – "Searching for the Neural Foundations of Spirituality and Religiosity in the predictive coding"** Co-I | \$ 452.500
- 2022–2025 **PNRR PhD funds, co-funded IRCCS Fatebenefratelli, Brescia** € 70.000
- 2022–2025 **BIAL Foundation – "The influence of emotions on actions: Boosting brain network plasticity"** Co-I | € 60.000
- 2020 **Ministerio de Ciencia, España – "The role of alpha oscillations in gating sensory processing during Working Memory"** Co-I | € 99.220
- 2019 **BIAL Grant – "Boosting WM capacity by strengthening the oscillatory functional fronto-parietal pathway"** PI | € 47.000

RETI SCIENTIFICHE E COLLABORAZIONI INTERNAZIONALI

- Collaborazioni attive con: Harvard Medical School, UCL, Oxford, Cambridge, University of Glasgow, University of Geneva, Osaka University, Universidad de Nebrija, Universidad de La Laguna, Universitat Pompeu Fabra, IMT Lucca, IRCCS Fondazione Santa Lucia
- Revisore per ERC (starting e advanced grants), MRC (UK), BBSRC (UK), ANR (Francia), INSERM (Francia), NWO (Paesi Bassi), DFG (Germania), FWF (Austria), SNF (Svizzera), ISF (Israele), NSERC (Canada)
- Presidente scientifico del Congresso Nazionale SIPF 2024, Campus di Cesena, Università di Bologna
- Organizzatore di numerosi simposi nazionali e internazionali in Neuroscienze Cognitive

ATTIVITÀ EDITORIALE

- Associate Editor, *Frontiers in Cognitive Neuroscience* (2020 – oggi); *Frontiers in Psychology* (2022 – oggi)
- Academic Editor, *Biomedicines* (2022 – oggi)
- Editorial Board Member, *Scientific Reports – Nature Research* (2017 – oggi)
- Guest Editor, *Frontiers in Consciousness Research* (2017 – oggi)
- Reviewing Editor, *Frontiers in Perception Science* (2010 – oggi); *Frontiers in Human Neuroscience* (2012 – oggi); *Frontiers in Neuroimaging* (2021 – oggi)
- Revisore ad hoc per: *Nature Communications*, *Nature Human Behaviour*, *Current Biology*, *PNAS*, *Journal of Neuroscience*, *Cerebral Cortex*, *Brain Stimulation*, *NeuroImage*, *PLoS Biology*, *Science Advances*, *Advanced Sciences* e oltre 40 riviste ISI
- Fellow registrato della Higher Education Academy (UK) (2015 – oggi)

INCARICHI ACCADEMICI E DI GOVERNANCE

- 2024 – oggi **Direttore del Corso di LM in Neuroscienze e Riabilitazione Neuropsicologica** Università di Bologna
- 2021 – oggi **Membro della Commissione Ricerca di Dipartimento** Università di Bologna
- 2021 – oggi **Membro del Research Quality Group** Dipartimento di Psicologia, UNIBO
- 2019 – oggi **Membro del Collegio del Dottorato in Health and Technologies** Università di Bologna

PREMI E RICONOSCIMENTI (Ultimi 5 anni)

- 2020 **Best Contribution Award** Transcranial Brain Stimulation in Cognitive Neuroscience Workshop, Rovereto, Italia
- 2022 **Best Paper Award** *Biomedicines* for the article: “The role of alpha oscillations among the main neuropsychiatric disorders in the adult and developing human brain: Evidence from the last 10 years of research”
- 2023 **PREMIO SIPF JUNIOR**, SIPF 2023, assegnato a **Jelena Trajkovic**, di cui sono stato supervisore di dottorato, ora Assistant Professor presso l'Università di Maastricht
- 2023 **PREMIO SINP Miglior tesi di dottorato**, assegnato a **Jelena Trajkovic**, di cui sono stato supervisore di dottorato.
- 2023 **Premio SIPF Giovani – miglior contributo scientifico**, SIPF 2023, assegnato a **Luca Tarasi**, di cui sono stato supervisore di dottorato, ora Post-Doc presso il laboratorio Consciousness, Università di Bologna, vincitore di grant internazionale BIAL del valore di 60K.

- 2025 **Premio AIP – miglior Tesi di Dottorato**, assegnato a **Luca Tarasi**, di cui sono stato supervisore di dottorato.
- 2025 **Premio SIPF Giovani – miglior contributo scientifico**, SIPF 2025, assegnato ad **Anna Pasini**, di cui sono stato supervisore di tesi magistrale, ora dottoranda presso Università di Bologna.
- 2025 **Premio miglior poster**, Metacognition, Aging and Perception Symposium, assegnato ad **Anna Pasini**, di cui sono stato supervisore di tesi magistrale, ora dottoranda presso Università di Bologna.

2016

Riferimento bibliografico	IF / tipo
Fiori F, Chiappini E, Soriano M, Paracampo R, Romei V , Borgomaneri S, Avenanti A (2016). Long-latency modulation of motor cortex excitability by ipsilateral posterior inferior frontal gyrus and pre-supplementary motor area. <i>Scientific Reports</i> 6:38396.	IF 4.1
Romei V* , Thut G, Silvanto J (2016). Information-Based Approaches of Noninvasive Transcranial Brain Stimulation. <i>Trends in Neurosciences</i> 39(11):782-795. <i>corr author</i>	IF 15.7
Romei V* , Chiappini E, Hibbard PB, Avenanti A (2016). Empowering Reentrant Projections from V5 to V1 Boosts Sensitivity to Motion. <i>Current Biology</i> 26(16):2155-2160. <i>corr author</i>	IF 9.0
Rigato S, Rieger G, Romei V* (2016). Multisensory signalling enhances pupil dilation. <i>Scientific Reports</i> 6:26188. <i>corr author</i>	IF 4.1
ten Oever S, Romei V , van Atteveldt N, Soto-Faraco S, Murray MM, Matusz PJ (2016). The COGs (context, object, and goals) in multisensory processing. <i>Experimental Brain Research</i> 234(5):1307-1323.	IF 2.2
Romei V* , Bauer M, Brooks JL, Economides M, Penny W, Thut G, Driver J, Bestmann S (2016). Causal evidence that intrinsic beta-frequency is relevant for enhanced signal propagation in the motor system as shown through rhythmic TMS. <i>Neuroimage</i> 126:120-130. <i>corr author</i>	IF 4.5
Murray MM, Thelen A, Thut G, Romei V , Martuzzi R, Matusz PJ (2016). The multisensory function of the human primary visual cortex. <i>Neuropsychologia</i> 83:161-169.	IF 3.0

2015

Riferimento bibliografico	IF / tipo
Cecere R, Rees G, Romei V (2015). Individual differences in alpha frequency drive crossmodal illusory perception. <i>Current Biology</i> 25(2):231-235.	IF 9.0

2014

Riferimento bibliografico	IF / tipo
Sutherland CA, Thut G, Romei V* (2014). Hearing brighter: changing in-depth visual perception through looming sounds. <i>Cognition</i> 132(3):312-323. <i>corr author</i>	IF 3.9
Cecere R, Romei V , Bertini C, Làdavas E (2014). Crossmodal enhancement of visual orientation discrimination by looming sounds requires functional activation of primary visual areas: a case study. <i>Neuropsychologia</i> 56:350-358.	IF 3.0

2013

Riferimento bibliografico	IF / tipo
Smittenaar P, FitzGerald TH, Romei V , Wright ND, Dolan RJ (2013). Disruption of dorsolateral prefrontal cortex decreases model-based in favor of model-free control in humans. <i>Neuron</i> 80(4):914-919.	IF 16.2
Romei V* , Murray MM, Cappe C, Thut G (2013). The contributions of sensory dominance and attentional bias to cross-modal enhancement of visual cortex excitability. <i>Journal of Cognitive Neuroscience</i> 25(7):1122-1135. <i>corr author</i>	IF 3.5
de Haas B, Cecere R, Cullen H, Driver J, Romei V* (2013). The duration of a co-occurring sound modulates visual detection performance in humans. <i>PLoS One</i> 8(1):e54789. <i>corr author</i>	IF 3.2

2012

Riferimento bibliografico	IF / tipo
Romei V* , Gross J, Thut G (2012). Sounds reset rhythms of visual cortex and corresponding human visual perception. <i>Current Biology</i> 22(9):807-813. <i>corr author</i>	IF 9.0
Romei V* , Thut G, Mok RM, Schyns PG, Driver J (2012). Causal implication by rhythmic transcranial magnetic stimulation of alpha frequency in feature-based local vs. global attention. <i>European Journal of Neuroscience</i> 35(6):968-974. <i>corr author</i>	IF 3.5
Cappe C, Thelen A, Romei V , Thut G, Murray MM (2012). Looming signals reveal synergistic principles of multisensory integration. <i>Journal of Neuroscience</i> 32(4):1171-1182.	IF 4.4

2011

Riferimento bibliografico	IF / tipo
Romei V , De Haas B, Mok RM, Driver J (2011). Auditory Stimulus Timing Influences Perceived Duration of Co-Occurring Visual Stimuli. <i>Frontiers in Psychology</i> 2:215.	IF 2.9
Thut G, Veniero D, Romei V , Miniussi C, Schyns P, Gross J (2011). Rhythmic TMS causes local entrainment of natural oscillatory signatures. <i>Current Biology</i> 21(14):1176-1185.	IF 9.0
Leo F, Romei V , Freeman E, Ladavas E, Driver J (2011). Looming sounds enhance orientation sensitivity for visual stimuli on the same side as such sounds. <i>Experimental Brain Research</i> 213(2-3):193-201.	IF 2.2
Romei V* , Driver J, Schyns PG, Thut G (2011). Rhythmic TMS over parietal cortex links distinct brain frequencies to global versus local visual processing. <i>Current Biology</i> 21(4):334-337. <i>corr author</i>	IF 9.0
Hoogenboom N, Romei V (2010/2011). Probing different time-scales of oscillatory fluctuations in visual awareness: from behavior to phase. <i>Frontiers in Human Neuroscience</i> 4:178.	IF 2.9

2010

Riferimento bibliografico	IF / tipo
Cappe C, Thut G, Romei V , Murray MM (2010). Auditory-visual multisensory interactions in humans: timing, topography, directionality, and sources. <i>Journal of Neuroscience</i> 30(38):12572-12580.	IF 4.4
Romei V , Gross J, Thut G (2010). On the role of prestimulus alpha rhythms over occipito-parietal areas in visual input regulation: correlation or causation?. <i>Journal of Neuroscience</i> 30(25):8692-8697. <i>corr author</i>	IF 4.4
Brodbeck V, Thut G, Spinelli L, Romei V , Tyrand R, Michel CM, Seeck M (2010). Effects of repetitive transcranial magnetic stimulation on spike pattern and topography in patients with focal epilepsy. <i>Brain Topography</i> 22(4):267-280.	IF 3.0

2009

Riferimento bibliografico	IF / tipo
Romei V* , Murray MM, Cappe C, Thut G (2009). Preperceptual and stimulus-selective enhancement of low-level human visual cortex excitability by sounds. <i>Current Biology</i> 19(21):1799-1805. <i>corr author</i>	IF 9.0
Romei V* , Thut G, Ramos-Estebanez C, Pascual-Leone A (2009). M1 contributes to the intrinsic but not the extrinsic components of motor-skills. <i>Cortex</i> 45(9):1058-1064. <i>corr author</i>	IF 3.3
Cappe C, Thut G, Romei V , Murray MM (2009). Selective integration of auditory-visual looming cues by humans. <i>Neuropsychologia</i> 47(4):1045-1052.	IF 3.0

2008

Riferimento bibliografico	IF / tipo
Romei V* , De Gennaro L, Fratello F, Curcio G, Ferrara M, Pascual-Leone A, Bertini M (2008). Interhemispheric transfer deficit in alexithymia: a transcranial magnetic stimulation study. <i>Psychotherapy and Psychosomatics</i> 77(3):175-181. <i>corr author</i>	IF 8.4
Romei V , Rihs T, Brodbeck V, Thut G (2008). Resting electroencephalogram alpha-power over posterior sites indexes baseline visual cortex excitability. <i>Neuroreport</i> 19(2):203-208.	IF 2.0
Romei V , Brodbeck V, Michel C, Amedi A, Pascual-Leone A, Thut G (2008). Spontaneous fluctuations in posterior alpha-band EEG activity reflect variability in excitability of human visual areas. <i>Cerebral Cortex</i> 18(9):2010-2018.	IF 4.9

2007

Riferimento bibliografico	IF / tipo
Romei V* , Murray MM, Merabet LB, Thut G (2007). Occipital transcranial magnetic stimulation has opposing effects on visual and auditory stimulus detection: implications for multisensory interactions. <i>Journal of Neuroscience</i> 27(43):11465-11472. <i>corr author</i>	IF 4.4
Ramos-Estebanez C, Merabet LB, Machii K, Fregni F, Thut G, Wagner TA, Romei V , Amedi A, Pascual-Leone A (2007). Visual phosphene perception modulated by subthreshold crossmodal sensory stimulation. <i>Journal of Neuroscience</i> 27(15):4178-4181.	IF 4.4

2003–2005

Riferimento bibliografico	IF / tipo
Bertini M, De Gennaro L, Ferrara M, Curcio G, Romei V , Fratello F, Cristiani R, Pauri F, Rossini PM (2004). Reduction of transcallosal inhibition upon awakening from REM sleep in humans as assessed by transcranial magnetic stimulation. <i>Sleep</i> 27(5):875-882.	IF 5.6
De Gennaro L, Bertini M, Ferrara M, Curcio G, Cristiani R, Romei V , Fratello F, Pauri F, Rossini PM (2004). Intracortical inhibition and facilitation upon awakening from different sleep stages: a transcranial magnetic stimulation study. <i>European Journal of Neuroscience</i> 19(11):3099-3104.	IF 3.5
De Gennaro L, Cristiani R, Bertini M, Curcio G, Ferrara M, Fratello F, Romei V , Rossini PM (2004). Handedness is mainly associated with an asymmetry of corticospinal excitability and not of transcallosal inhibition. <i>Clinical Neurophysiology</i> 115(6):1305-1312.	IF 4.2
Bertini M, Ferrara M, De Gennaro L, Curcio G, Fratello F, Romei V , Pauri F, Rossini PM (2004). Corticospinal excitability and sleep: a motor threshold assessment by transcranial magnetic stimulation after awakenings from REM and NREM sleep. <i>Journal of Sleep Research</i> 13(1):31-36.	IF 4.5
De Gennaro L, Ferrara M, Bertini M, Pauri F, Cristiani R, Curcio G, Romei V , Fratello F, Rossini PM (2003). Reproducibility of callosal effects of transcranial magnetic stimulation (TMS) with interhemispheric paired pulses. <i>Neuroscience Research</i> 46(2):219-227.	IF 3.0
